

Liam Morgan

Senior Software Developer

Experienced Software Developer with a strong background in building, deploying and maintaining web applications and infrastructure. Skilled in full-stack development, Docker, Linux, databases, APIs, cloud services and AI development.

Experienced in taking projects from idea through to production, solving complex technical problems and working across teams – including leading company-wide focus groups to tackle cross-team issues and find practical solutions.

I closely follow developments in AI and LLM tooling, applying new techniques to real projects as they emerge, and I'm active in the open-source space, finding, contributing to and adopting useful OSS projects.

Experience

Firefish Software	Remote
Senior Software Developer	Oct 2023 - Present
• Work across multiple development teams, contributing to a wide range of projects and technical initiatives throughout my time at the company. • Head company-wide focus groups focused on improving development across teams, including building shared component libraries and evaluating, implementing and championing new AI tools and workflows (e.g. agentic coding tools like Claude Code) to support developers. • Work closely with Product Owners and team leads to turn requirements into technical designs and practical solutions. • Run sprint planning, technical handovers and retrospectives, helping teams plan work and improve their development processes. • Manage a development sprint team, overseeing sprint health, workload, priorities and delivery while supporting the team throughout the sprint. • Actively participate in code reviews, providing constructive feedback to peers to ensure adherence to team coding standards and best practices. • Develop applications and services using C#, JavaScript, AngularJS, React, HTML/CSS and SQL Server, with Azure, Bitbucket, Jira and Claude Code.	

Executive Software Developer	Aug 2022 - Oct 2023
https://www.firefishsoftware.com/	

Intersnack Group	Stanley, County Durham
Developer / Analyst	Aug 2018 - Jul 2022
• Developed and maintained a web-based PLM application, delivering new features, fixing bugs and improving existing functionality. • Worked as the sole developer across C#, JavaScript, HTML, CSS, Bootstrap, SQL/PLSQL and BI Publisher.	

Skills

<code></> C#</code>
📄 TypeScript / JavaScript
🗄 SQL
🐳 Docker
🤖 AI Development
📄 HTML / CSS
🔗 CI/CD - Jenkins
🔗 Version Control
📅 Agile Methodologies

Interests

📄 Self hosting
🎮 Gaming
🥋 Brazilian Jiu-Jitsu

Profiles

🐱 GitHub

📘 LinkedIn
liammorgan97

- Worked extensively with Oracle databases, developing queries, procedures, functions, triggers and views, alongside creating reports using BI Publisher.

Tharsus	Blyth, Northumberland
Data Analyst	May 2018 - Aug 2018
• Analysed and visualised production data to help improve the efficiency of assembly lines. • Worked directly with the CTO to develop the company's data analysis capabilities and deliver a new data-driven project. • Used Python, Pandas and NumPy extensively for data analysis, processing and visualisation.	

Education

Northumbria University	Computer Science • 2:1
Computer Science	Newcastle • 2015-2018
New College Durham	Level 3 Extended Diploma • Distinction *
Computing	Durham, County Durham • 2013-2015
Greenfield Community College	
Newton Aycliffe, County Durham • 2008-2013	

Projects

Partners Printhouse	2026
Creating an online shop and admin portal for a local custom clothing business, allowing people to create and pay for their orders online, as well as a backend for admins to manage all their orders and custom prints, work in progress launching later this year as a side project https://PartnersPrinthouse.co.uk	
GroupScape	2026
A RuneLite plugin with an accompanying website and server, used to track teammates' in-game data and position in real time. Published on the official plugin hub and actively maintained with regular updates. https://GroupScape.online	
NxtGenBJJ.com	2025
Created and hosted a membership portal and public website for my local Jiu-jitsu gym, they were struggling with cash only payments and a name in the book honor system, and people missing payments. I suggested that I could build a system for them to handle all memberships digitally and give people a way to manage their membership and pay online. Installed a tablet with it's own kiosk interface on the site in the gym and have seen amazing feedback from the membership and owners. https://NxtGenBJJ.com
